

Hamza Javed

DATA ENGINEER

✉ hamzaster@gmail.com | 📱 hamzaster | 🌐 hamzajaved

Senior Data Engineer with 10+ years of experience designing and operating production-grade ETL/ELT pipelines and cloud data platforms. Deep expertise in **Python** application engineering, **AWS** (S3, Glue, IAM, CloudWatch, Lambda), and config-driven, environment-aware pipeline design across dev/uat/prod. Strong background in schema normalisation, deduplication, incremental ingestion (Auto Loader, CDC/MERGE), data quality validation, and CI/CD (GitHub, Terraform). Comfortable operating legacy and actively evolving pipelines side by side, with a track record of building monitoring, alerting and operational-debugging practices that keep critical data platforms reliable. Experienced across regulated and enterprise environments, translating business and governance requirements into robust, maintainable data systems.

Work Experience

Warner Bros Discovery

Remote / UK

SENIOR DATA ENGINEER

Jul. 2022 — Current

- Architected and optimised scalable **ETL/ELT** pipelines using **Python**, SQL, Databricks and cloud technologies, supporting critical business datasets
- Designed ingestion, transformation and monitoring workflows on **AWS**, including **Glue**, **S3**, **IAM** and **CloudWatch**, with job orchestration and Data Catalog metadata management
- Implemented **data quality validation frameworks**, automated testing and monitoring/alerting to catch silent failures and partial-output issues before they reached production
- Built **CI/CD** pipelines with GitHub and Terraform, enabling config-driven, environment-aware deployment across dev/uat/prod
- Implemented incremental, fault-tolerant ingestion (Auto Loader) with schema inference/evolution and checkpointing into Delta Lake
- Applied data governance practices – metadata management, lineage, access controls – using Unity Catalog
- Mentored junior engineers through code reviews and technical guidance

Homes England

UK

DATA ENGINEER

Jul. 2021 — Jul. 2022

- Built and maintained **Azure Data Factory** pipelines and SQL-based transformation workflows for automated Market Intelligence data platforms
- Developed **ETL/ELT** pipelines and data quality controls for critical, regulator-facing business datasets
- Collaborated with stakeholders to ensure data governance and **regulatory compliance** requirements were met

Cadent Gas

UK

DATA ENGINEER

Mar. 2019 — Sep. 2019

- Designed **ETL/ELT** pipelines in **Python** to automate ingestion, transformation and validation of SAP HANA data
- Developed logical and physical data models in SAP HANA and integrated with Tableau and Lumira reporting tools

Jaguar Land Rover

UK

DATA ENGINEER

Jul. 2013 — Feb. 2019

- Built and maintained data pipelines in **Python** ingesting into GCP BigQuery and Azure, supporting large-scale enterprise data migration
- Designed ETL workflows using BigQuery and Cloud Storage; maintained PostgreSQL and Azure-based data infrastructure
- Implemented **monitoring and alerting** processes for critical data pipelines

Education

University of Sussex

Brighton

MSc INFORMATION TECHNOLOGY

Sep. 2008 - Sep. 2010

University of Central Punjab

Lahore, Pakistan

B.Sc. IN COMPUTER SCIENCES

Sep. 2003 - Sep. 2007

Skills

Cloud Platforms	Design and operation of data infrastructure across major cloud providers AWS (Glue, S3, IAM, Lambda, CloudWatch), Azure, GCP
Data Warehousing & Modelling	Design of dimensional and cloud-native data models for analytics Snowflake, BigQuery, PostgreSQL, SQL Server, Oracle, Data Modelling, Dimensional Modelling
Data Engineering & Orchestration	Building and orchestrating large-scale ETL/ELT pipelines Apache Spark, PySpark, Databricks, Delta Lake, Apache Airflow, dbt, Azure Data Factory, Fivetran, Airbyte
Software Engineering & DevOps	Production-grade Python development with automated delivery Python, SQL, Terraform, GitHub, CI/CD
Data Governance & Quality	Frameworks ensuring trustworthy, well-documented data Data Governance, Metadata Management, Data Quality Frameworks, Data Validation
Performance & Architecture	Designing and tuning systems for cost, reliability and scale Performance Tuning, Cost Optimization, Monitoring & Alerting, Data Architecture Design
BI & Analytics	Delivering self-serve reporting and dashboards to stakeholders Power BI, Tableau, Looker
